DL 100-10461

It is to be noted that page 150A of Dallas report of SA ROBERT P. GEMBERLING dated November 30, 1963, reflects that WILLIAM ALLEN HARPER had found a piece of bone approximately 25 feet south of the spot where President KENNEDY was shot. It should be further noted that this is in the same general area where Mr. and Mrs. WAYNE E. HARTMAN observed a gouged out hole in the grass about one and one half inches in diameter and 18 to 24 inches in length.

It should also be noted that this gouged out hole in the grass observed by Mr. and Mrs. WAYNE E. HARTMAN is in line with the shot that struck President KENNEDY in the head. Further, it should also be noted that the gouged out hole in the grass observed by Mr. and Mrs. WAYNE E. HARTMAN is not in a direct line with the mark on the curb about 25 feet east of the east edge of the triple underpass on the south side of Main Street.
